

ENVIRONMENTAL POLICY

Wesco Aircraft, as the global industry leader of products and services for aerospace, defense and general industrial application, is committed to the protection of the environment. We use our Environmental Management System to:

Ensure compliance with relevant environmental legislation and regulations.

Achieve our objectives and goals with continual improvements in environmental performance.

Reduce environmental pollution by recycling and re-using by-products and waste.

Train and communicate environmental best practices to all employees.

Have our environmental policy documented, implemented, maintained and available.
